Best Premium Account Generator for Pornhub, PornMate and. com account. Pornhub Premium Account Generator Free Pornhub Premium Account Generator. Q: How to use REGEXP in SQL in the below case I have a column where I need to validate using Regex. Example: col1 "snow.jpg" "snow.png" "snow2.jpg" "snow3.jpg" "abc.pdf" I need to get the unique col1 value. Example: "snow.jpg" "snow2.jpg" "abc.pdf" I am trying to use the REGEXP SELECT distinct col1 from tablename WHERE col1 REGEXP "[s]now[aA]" The above case does not work. What should be the correct regular expression. The below case also does not work SELECT distinct col1 from tablename WHERE col1 REGEXP "snow(.\*).png" A: Regexp are not appropriate for this kind of task. The problem is that you want to ignore the punctuation. Using only a regexp would ignore e.g. .jpg, which you don't want. You should really have a dedicated table that contains the files that you don't want to accept, and then join to this table and do a simple query. SELECT DISTINCT t.col1 FROM tablename t LEFT JOIN dontaccept t2 on t.col1 = t2.col1 WHERE t2.
