I have a text box on the page that has the following javascript to get it's value: function getValue(el) { var value = \$('#' + el.id).val(); return value; } The text box id is: text-0 When I select some text on the page and post it to the server, I get an error stating: Message: Document was empty I think the problem is with the IE9 compatibility mode, but I can't figure out how to fix it. Any ideas? Thanks A: Use the.text() function instead, it's compatible with older versions of IE: var value = document.getElementById(el.id).value; A: If you're using jQuery, use.val() instead of.val(): function getValue(el) { return \$('#' + el.id).val(); } 1. Field of the Invention The present invention relates to a display apparatus. 2. Description of the Related Art In recent years, display apparatuses used in television receivers, mobile phones, personal digital assistants, and so on, are shifting from cathode ray tubes (CRTs) to liquid crystal display apparatuses. This trend has led to the development of display apparatuses using organic EL elements. An organic EL element has a structure in which a functional organic thin film is disposed between a pair of electrodes. An organic thin film includes a light-emitting layer, a hole transport layer, an electron transport layer, and so on. Light emission is caused by applying a predetermined voltage to the organic thin film between the electrodes. In a display apparatus using an organic EL element, a high-luminance and high-contrast image can be displayed by improving the

Windows 8 drivers is included in Windows Updates from Microsoft. They are included with the Windows Updates along with the Software or drivers for other hardware components. A: No, they're not compatible. 4.8 / 5 (35 votes) Hello everyone, I am Rupali here, Today I would be posting an incredible new app called “CakeSync” which helps you make a cake in your own kitchen and it’s totally free. So today I’m going to tell you about this amazing piece of software, but if you know anything about CakeSync then I’m sure that you would be able to finish reading this article very quickly and after that you will install this app on your mobile. But before going further let me tell you one thing that you should be very much happy, that this software is totally free and that’s why I said CakeSync. This wonderful app is the work of one single developer, which is called “CakeSync Studio“. This software is not available in Google Play Store, but it can be downloaded from the developer’s personal website or you can directly download it from the developer’s repository as well. I guess that you know about this app and you are ready to go on with reading this post or if you are not familiar with CakeSync then you should go to the developer’s website to know more about it. So, without wasting any time, let’s start the process of CakeSync. Details of CakeSync CakeSync is a fantastic app, which is very simple in usage and is very easy to operate. So, I would say that it is much easier to use than the normal apps that are present in the app stores. This software can be downloaded for free from the developer’s website, but you will have to fill out a short form and then you will have to download the installation file of this app. After you are done with that you can install the app on your mobile or tablet and then you can use it. So, the beauty of this app is that it can be used to make cakes for various kinds of events. I mean, you can use this app to make a cake for a birthday party or for any other event as well. So, without wasting any time, let’s have a look at the features 2d92ce491b
