What's New in the Occult Watcher?

How to use Occult Watcher in your Astrophotography: Step 1: Choose your preset location: Northeast, Center, South or West. Step 2: Choose your preset date: Date before and after 1990, 2006 and 2012. Step 3: Choose your preset time of the day: Morning or Evening. Step 4: If you want to be updated with all the upcoming events, you can either click "Mark Events" or select "Planned Observations" from the top menu bar. Step 5: If you want to mark the occultations, just click the "Marking down" button and select the start and end times. Step 6: You are ready to update all the upcoming events right away. Note: You can mark the events at any time, not just the predicted one. Step 7: Download Occult Watcher's desktop program for Windows or Mac for free Occult Watcher Key Features: See all the upcoming events in your selected preset location, date and time, predicted and ideal. Plan your observation anytime to catch the best events. Provides a list of all the upcoming events and details of all the stars and asteroids included in the events. If one event has already been predicted by someone else for your location, preset date and time, a checkmark will be put next to the event. It's easy to plan an observation of all the occultations by marking the predicted events. All the events can be searched and filtered by Object name and Name of the star and asteroid. Get the detailed information about the stars and asteroid included in the event. You can observe the stars and asteroids through graph view, text view and many other views. If you have already uploaded your images to Astrophotography.net, you can directly preview the images that you have already taken. If you are not a member yet, click "Join now" to become one. Your password will be sent to you via e-mail. • You can download images of stars, asteroids, meteor showers and other astronomical events from Astrophotography.net and upload them to your account. Wednesday, May 12, 2017 You are welcome to download the latest version of the GIFV file format with the MKG file editor for Mac. MKG is a free software application that allows you to view and edit GIFV files on Mac. Moreover, MKG can also convert GIFV file to other formats
