May 11, 2017.JOIN OUR TEAM CHANGE THE WORLD Meet Casey McKittrick My name is Casey McKittrick and I would love to speak with you about changing the world. My parents named me after 'Casey's Irish Curse'... But I've always liked the meaning, and I'm still learning about it myself. I currently am the director of community engagement for the Inspiring Change alliance, our cross-societal mission. I get to combine my love for people, fundraising, grant writing, and fundraising- and put them to use in moving our mission forward. When I'm not working on a great new project or in the office, I can be found playing with my nieces and nephews, making my daughter an Irish doll, crocheting, cross-stitching, or working on my French and making salads!Q: RAZOR - how to change table header text and cell background color at once I have a table with one row and I wish to change the table header text and cell background color at once. It can be the footer using @Row.Footer but I need to change the headers too, not just the footer. I tried @Html.ActionLink("Tick boxes, " @Html.ActionLink("List", "List", new { Area = "Database" })), new { @class = "btn btn-default btn-xs" }) but not work so how to change the header text and background color at same time using Razor?
