Show notes: -The news on Steam's issues -We find some bugs -We finish our review -The new Gamescom trailer -We briefly talk about The Witcher 3 Join us, won't you?Q: How to install node versions globally I am a beginner for Node.js. I want to install version 3.8.4 on Windows 7, So I need to install Node.js globally(i.e I don't want to install node.js in every project). I tried to install node.js by Node.js Installer, but when I execute command "npm install -g http-proxy@next" it throws the errors as > 'http-proxy@next' is not in the npm registry. . To install something globally, it's better not to have the local system depend on npm. npm ERR! tarballUrl npm ERR! ^ I have tried 'npm-install --global' and 'npm init'. I want to know why this error is coming and How to install Nodejs globally. A: If you already have Node and you want to install http-proxy, you can do: npm config set registry npm install -g http-proxy If you're running this at the command prompt, make sure to put this in your startup file, for example on Windows it would be: C:\Users\\AppData\Roaming pm\http-proxy\bin> npm config set registry Q: How to make the selected cells border wider than others in a table 595f342e71
